Preparación de fases de referencia

$$\phi(\vec{u}) = \sum_{i=1}^{N=15} a_i Z_i(\vec{u}).$$

Métrica de la magnitud de las aberraciones

$$\sigma = \sqrt{\sum_{i=1}^{N=15} a_i^2}.$$

 $=\sum$

$$Z_7$$
: Coma en y
 $a_7 = -0.5$

 $a_5 = 0.4$

 Z_2 : Inclinación en y

 $a_2 = 0.4$

: Coma en
$$x$$
 $a_8 = 0.3$

$$Z_{10}$$
 Trefoil en x
 $a_{10} = -0.2$
